Delhi, India

Summary

Computer Science (AI & ML) undergraduate building intelligent and practical software solutions. Interested in machine learning, problem solving, and developing technology that addresses real-world challenges. Actively involved in technical communities, currently serving as **Club Head of the Cloud Computing Club** at the Galgotias Tech Council – organized technical workshops increasing student participation by **40%+**.

Education

Galgotias University , Greater Noida, Uttar Pradesh	2024 – 2028
B.Tech in Computer Science and Engineering (AI & ML)	CGPA: 8.0
Sarvodaya Bal Vidyalaya No. 2 , Delhi	2024
CBSE Class XII	73.0%
Sarvodaya Bal Vidyalaya No. 2 , Delhi	2022
CBSE Class X	75.8%

Skills

Programming Languages : C++, Java, Python
AI / ML : Machine Learning, NLP, Generative AI, Prompt Engineering
Frameworks & Libraries: FastAPI, LangChain, NumPy, Pandas, Matplotlib
Backend Development : FastAPI, REST APIs, JDBC, Servlets
Frontend Development : HTML, CSS, JavaScript
Databases : MySQL, MongoDB
Developer Tools : Git, GitHub, VS Code, Apache Tomcat
Core CS : DSA, OOP, DBMS, OS

Projects

ContentFlow AI — GitHub **March – May 2026**

Tech Stack: Python, FastAPI, NLP, JavaScript, Reddit API, yt-dlp

- Built a **4-agent AI pipeline** automating content research, validation, script generation, and viral hook creation via real-time Reddit & YouTube trend analysis, cutting research time by **90%** and manual scripting effort by **85%**.
- Implemented weighted engagement scoring and competitor analysis with an NLP-based Hinglish script system, improving content selection accuracy by **70%** and generating creator-ready scripts in under **10 seconds**.
- Deployed scalable frontend and backend on Vercel and Render with no external LLM API dependency, reducing operational costs by **100%**.

AutoMarketer AI — GitHub **May – June 2026**

Tech Stack: Python, FastAPI, MongoDB, Groq API, Hugging Face, BeautifulSoup

- Built a full-stack marketing automation app that scrapes a website URL, extracts brand messaging, and auto-generates professional captions and image prompts via Groq's LLaMA 3.3-70B, with a **5-minute response cache** eliminating redundant API calls.
- Integrated Hugging Face FLUX.1 for AI image generation with automatic stock photo fallbacks (LoremFlickr, Picsum) and persisted all campaign data asynchronously in MongoDB Atlas via Motor.
- Delivered a responsive dark-mode glassmorphic dashboard with campaign history feed, copy-to-clipboard actions, and loading state tracking using vanilla HTML/CSS/JS.

Certifications

• Oracle Database SQL – Oracle Academy	Nov 2025
• Programming with Java – GUVI (HCL)	Aug 2025
• Cloud Computing Fundamentals – Infosys Springboard	Sep 2025
• Design Thinking – NPTEL	Jan 2026
